Summary

Software engineer and CTO at AkwadX Technologies with 4+ years building SaaS platforms, AI systems, and full-stack products. Hands-on across relational database design (PostgreSQL, MySQL), REST APIs and system integrations, authentication and access control, and Docker-based deployment. Led the architecture of Leen (formerly Muazaf), an AI operating platform developed within AkwadX and now being registered as an independent company. Final-semester BSc Software Engineering student at Üsküdar University.

Experience

Leen (formerly Muazaf) was developed within AkwadX Technologies and is now being registered as an independent company.

Chief Technology Officer

MAR 2024 – PRESENT

AkwadX Technologies · Istanbul

Lead technology architecture and delivery for enterprise SaaS platforms and AI systems. Design multi-tenant SaaS architecture and backend services; design and maintain relational databases (PostgreSQL); build REST APIs and system integrations; implement secure data infrastructure, including authentication and access control; manage deployments using Docker, Nginx and CI/CD on VPS/cloud environments.

- Led the architecture and development of Leen (formerly Muazaf), AkwadX's AI operating platform for agents, durable workflows and system integrations (Next.js, FastAPI, PostgreSQL, Redis, Qdrant, Temporal, Docker). Leen is now being registered as a separate company.
- Built the Omnichannel AI Support Platform, an earlier AkwadX product with voice and chat agents and knowledge-backed support across multiple channels.

Full Stack Software Developer MAR 2022 – FEB 2024

AkwadX Technologies · Istanbul

Designed and developed full-stack web applications across fintech, education and hospitality. Built backend services and REST APIs (Node.js/Express, Python FastAPI), designed relational database schemas (PostgreSQL, MySQL), developed React/Next.js front ends, managed code in Git, and deployed applications on VPS environments.

- Delivered a hotel management system covering reservations, room inventory and front-desk guest workflows.
- Delivered an inventory management system for SMEs with stock-movement tracking, low-stock threshold alerts and operational reporting.
- Built school management SaaS platforms serving educational organisations.

Education

Bachelor of Science in Software Engineering

Üsküdar University, Istanbul · 2022 – Expected 2027

Final semester in progress

High School Diploma

Hera Private High School

Technical stack

FRONTEND React.js · Next.js · Tailwind CSS

BACKEND Node.js · Express.js · Python · FastAPI

DATA SQL · PostgreSQL · MySQL · Redis · Qdrant

INFRASTRUCTURE Docker · Nginx · VPS deployment · CI/CD · Git

ENGINEERING PRACTICE REST API design · Authentication and access control · Multi-tenant SaaS architecture

AI AND SYSTEMS LLM APIs · RAG architecture · API integrations · System design · Temporal workflow engine
